

**CMSI 387-01**  
**OPERATING SYSTEMS**  
Spring 2014

**Assignment 0220 Feedback**

The proficiency for *2d* only goes as high as | in this assignment due because this is just the first of your operating system implementation assignments. The next assignments with this proficiency will be expansive enough to merit a + maximum.

**Thomas E. Bramanti**

*jadengore / edward@bramanti.org*

*2d* — You've invoked 3 system calls successfully, with some decent (though improvable) feedback for each one given the scope of this assignment. Easy peezy. (|)

*4a* — Code functions as intended. For something this brief, that's pretty much all there is to it. (+)

*4b* — Not much to do here in terms of separation of concerns, so consider this a "proficiency by default." Enjoy. (+)

*4c* — Not much code to read, so it better be readable! And it is. (+)

*4d* — You did your due diligence here in looking up system calls you can use then calling them correctly. (+)

*4e* — Commit frequency and messages are appropriate to the work done. (+)

*4f* — Submitted on time. (+)
