**OPERATING SYSTEMS**  
Spring 2014

**Assignment 0501 Feedback**

Thomas E. Bramanti

*jadengore / edward@bramanti.org*

*1a* — One can never issue too many commands :) (+)

*1b* — You transcribed your activity accurately and completely. (+)

*2e* — You performed some degree of byte-level navigation, but there are enough inconsistencies in your report to cast doubt on how much you truly understood this. In some cases, it is easy to just jump to conclusions because a data block has recognizable data, without knowing how to determine that data block based on directory and inode information. (/)

*4d* — You were able to use the information presented to a degree, but assorted glitches in your bit-level navigation show that you didn't use that information in full. (|)

*4e* — Commit frequency and messages are appropriate to the work done. (+)

*4f* — Initially submitted on time with a few revisions the next day. (+)
